

# Safety Training for Pipeline Professionals

*“No job is so important, and no service is so urgent that we cannot take time to perform our work safely.”*

### **Courses and Training Offered:**

- OSHA 10 and 30 hour for Construction
- Competent Person Training For Excavations
- NCCER Operator Qualification Training and Evaluations
- HAZWOPER 8 Hour Refresher

The best way to ensure the safety and compliance of your workers is by giving them the proper training they need. Superior Land Designs LLC is committed to providing the very best in classroom training for pipeline professionals. Courses are taught at our classroom location in Alpharetta, Georgia. However, if it is more convenient, many of the courses we offer can be brought to you.

Let us be your partner in safety ▶ ▶ ▶

Our Safety Trainer is Patrick Robinson. His career in utilities began in 2000. Every position he held encompassed some aspect of safety program development. In 2011 safety became his primary focus. He continues to pursue certifications and continuing education through Georgia Institute of Technology.

For more information or to obtain a quote for training, please contact:

- Cranes, Derricks, Hoists, Elevators, and Conveyors
- Excavations
- Fire Protection and Prevention
- Materials Handling, Storage, Use and Disposal
- Motor Vehicle and Mechanized Equipment Operations
- Safety and Health Programs
- Scaffolds
- Stairways and Ladders
- Tools – Hand and Power
- Welding and Cutting
- Plus many more...

## Competent Persons for Trenching and Excavation

Excavation and trenching are among the most hazardous construction operations. In fact, according to the Bureau of Labor Statistics, excavation and trench-related fatalities in 2016 were nearly double the average of the previous five years. To that end, Superior Land Designs has developed a comprehensive 1-day Competent Persons Training for Excavations. Individuals who successfully complete this course will be presented with a wallet card and Competent Person hard hat sticker.

### Some of the topics covered:

- Soil typing and analysis
- Correct sloping angles
- Different types of protection systems
- Hazard recognition

OSHA defines a competent person as an individual who is capable of identifying existing and predictable hazards or working conditions that are hazardous, unsanitary, or dangerous to employees and who is authorized to take prompt corrective measures to eliminate or control these hazards and conditions. Our course will equip your employees with the tools and knowledge to identify these hazards, mitigate them, and make sure everyone goes home safe at the end of the day.

# Pipeline Operator Qualifications (OQ)

As an Accredited Assessment Center, Superior Land Designs is proud to offer training and assessments through NCCER in any one of 127 covered tasks. We have multiple Master Trainers on staff. Testing can be done online or on paper if need be. Obtaining an OQ is a two-part process. First candidates must pass the written evaluation, and then an in field performance evaluation. Once complete, the results are sent to NCCER and then forwarded to ISN.

For more information on NCCER's Pipeline Program please visit:

<https://www.nccer.org/workforce-development-programs/pipeline>

<https://www.nccer.org/docs/default-source/pdfs/pipeline-coveredtasks.pdf>

Our 8-hour refresher course was developed to meet the requirements outlined in OSHA 29 CFR 1910.120 for 8 (eight) hours of annual refresher training for pipeline workers. Employers seeking compliance with OSHA's Hazardous Waste Operations and Emergency Response Standard should provide this refresher course for their employees who may be exposed to potentially dangerous substances or may be asked to assist in an emergency response. Upon successful completion, participants will be given a wallet card.

## Topics covered in this course include:

- Regulatory Overview
- Training Requirements
- Hazard Communication
- Personal Protective Equipment
- Site Characterization
- Reconnaissance
- Containment
- Decontamination Methods

This course ends with a simulated emergency response so students can put what they have learned into action!
